```
try(BufferedReader br= new BufferedReader(new FileReader("sample.txt")){
                    Exception occured but not handled
        //use the resource    succesfull no Exception

}catch(IOException e){          Exception occured
    e.printStatckTrace();
}
```

control came out and jvm only close the
resource which is used inside try(R)

Compile Time Error

```
try(BufferedReader br=new BufferedReader(new FileReader("sachin.txt"))){
    br=new BufferedReader(new FileReader("kohli.txt")));
}catch(IOException e){}
```

Variables which are declared as a part of try with Resource by
default compiler will make them as "final".

sachin.txt

br

kohli.txt

br.close()
